

Technical Specifications for NXT and Marketron Traffic

This document contains both minimum and recommended specifications for users accessing [Marketron Traffic](#) and/or [Marketron NXT](#) hosted software and services via the internet, or “cloud.” As with any internet-hosted software, many variables can affect the user’s overall experience. The minimum requirements should establish a reasonable level of performance and satisfactory working experience. Aiming for (or exceeding) the recommended specifications will result in a better experience.

Hardware Specifications

	Minimum Requirements	Recommended Specifications
Processor	1.6 GHz Dual Core 32-bit (x86) or 64-bit (x64)	2.0 GHz Dual Core 32-bit (x86) or 64-bit (x64)
Memory (RAM)	4 GB	8 GB
Available hard disk space	500 MB	2.0 GB

Note: Microsoft Surface tablets and laptops are not recommended for use with [Marketron Traffic](#). Contact Marketron Support for additional information.

Supported Operating Systems

Windows 10 Windows 8 Mac OS X 10.11 (or higher)

Supported Internet Browsers

Google Chrome Mozilla Firefox Microsoft Edge Microsoft Internet Explorer 11

- Users of [Marketron NXT](#) services are recommended to use Google Chrome or Mozilla Firefox.
- All browsers listed above will utilize the Citrix XenApp Online Plug-In (free download).
- Browsers must support TLS 1.2.

Note: Mac users may find that a browser supporting TLS 1.2 requires a newer version of the OS X operating system, which some older Mac hardware may not support.

Other Specifications

	Minimum Requirements	Recommended Specifications
High-speed internet connection	128 Kbps sustained bandwidth <u>per user</u>	256 Kbps sustained bandwidth <u>per user</u>
Monitor	Monitor should support 1280 x 1024 resolution	1280 x 1024 resolution or better (user preference)
