

Discover the Security & Ease of Electronic Payments

[Insert Station Name] provides the ease of online payments and peace of mind. The highest PCI compliance means your data is always safe and protected, unlike the vulnerable position paper checks put you in.

Why Make the Switch?

- [Insert Station Name] offers the ability to process payments easily and securely with ACH, credit and debit.
- Make payments whenever best fits your busy schedule with our emailed invoices. Using guest checkout directly from the email lets you pay even faster.
- Digitalizing your advertising payments means simplified accounting and bookkeeping. You'll save hours of business time when you're not managing paper payments.

There's More!

The PayNow Advertising Portal provides convenient access to manage your account information, including addresses, contacts, invoice format preferences and delivery options. You can also pay one or multiple invoices at a time, make pre-payments and view your electronic payment history.

Protecting You from Paper Check Fraud

Writing paper checks for your payments comes with inherent risks. Each check is printed with your name, account number and bank routing number, providing anyone who crosses paths with your check all the information they need to make fraudulent payments from your account.

Reduce your exposure to the possibility of fraud by paying online.

- The highest level of PCI compliance and protocols means your data safety is covered.
- Card information is encrypted on all processing devices, and sensitive information is never stored.
- Our full end-to-end encryption uses modern tokenization services, ensuring data cannot be intercepted or viewed by unauthorized parties.
